

# SECURITY POLICY

The Committee and staff of Leander Club take the security of our members and guests extremely seriously.

Leander Club uses CCTV on the perimeter of the building, and in the Reception area and also conducts regular internal and external building inspections.

Images may be stored for up to one month and are then deleted. They are used in connection with controlling entry and exit to the car park and club house and may be made available to the authorities in connection with investigating suspected illegal activity.

Our staff may require members and guests to confirm their identity on arrival at the Club. Please assist the staff in keeping you secure.
